

CAD/CAM  
Architecture Course

BAVARSITY Campus  
Paternoster

## Course Overview

The CAD/CAM Architecture Course is designed for individuals aspiring to create detailed architectural designs, 2D models, and realistic renders of homes and buildings

In this 20-module course, you will learn the ins and outs of Computer-Aided Design (CAD) and Computer-Aided Manufacturing (CAM) technology to bring your architectural visions to life

Whether you're a budding architect, interior designer, or simply passionate about architectural visualization, this course equips you with the skills to design and present your ideas professionally

# Module 1

## Introduction to CAD and CAM in Architecture

- Understand the role of CAD and CAM in architectural design
- Explore the software tools used in the field

## MODULE 2 ARCHITECTURAL DRAWING FUNDAMENTALS

- Master the basics of architectural drawing
- Learn to create accurate floor plans and elevations

## Module 3 2D Modelling Techniques

- Develop 2D modelling skills for architectural schematics
- Create precise and scaled drawings

## Module 4

### Introduction to CAD Software

- Get acquainted with CAD software interfaces
- Explore the fundamental tools and commands

## Module 5 Creating Floor Plans

- Learn to design detailed floor plans for homes and buildings
- Incorporate measurements, layouts, and notations

## Module 6 Elevations and Sections

- Understand how to create elevation views and cross-sections
- Incorporate architectural details and annotations

## Module 7 Interior Design and Spatial Planning

- Explore interior design concepts and spatial planning
- Design functional and aesthetically pleasing interior

# Module 8

## CAD Software Proficiency

- Enhance your CAD software skills
- Work on complex architectural designs and project

## Module 9

### 3D Modelling and Rendering

- Dive into 3D modelling and rendering techniques
- Create lifelike 3D architectural models and visualizations

## Module 10

### Lighting and Materials

- Understand how lighting and materials affect architectural renders
- Achieve realism in your designs

## Module 11 Landscaping and Outdoor Spaces

- Design outdoor spaces, gardens, and landscapes
- Integrate green spaces with your architectural projects

## Module 12

### Sustainable and Eco-Friendly Design

- Explore sustainable architectural design principles
- Create eco-friendly and energy-efficient designs

# MODULE 13

## CAD/CAM in Building Construction

- Learn how CAD/CAM technology is utilized in building construction
- Understand its role in optimizing construction processes

# Module 14

## Advanced 3D Rendering

- Master advanced 3D rendering techniques for stunning visualizations
- Add realism and ambiance to your designs

## Module 15 Architectural Presentation

- Prepare professional architectural presentations
- Learn how to effectively communicate your design ideas

---

## Module 16 Design Software Integration

- Explore how CAD/CAM tools can be integrated with other design software
- Enhance your workflow and productivity

# Module 17

## Building Codes and Regulations

- Understand local building codes and regulations
- Ensure compliance and safety in your designs

# MODULE 18

## Architectural Portfolio Development

- Create an impressive portfolio showcasing your work
- Prepare for job interviews and client presentations

## Module 19

### Project Management in Architecture

---

- Learn project management skills specific to architectural projects
- Plan, budget, and execute projects effectively

# Module 20

## Capstone Project and Graduation

- Complete a comprehensive architectural design project
- Showcase your skills and creativity in a final exhibition

Upon completing this course, you will be well-equipped to pursue a rewarding career in architecture, interior design, or architectural visualization

You'll have the skills and portfolio to make your mark in the world of architectural design and presentation
