# Professional Locksmith Certification Course

BAVARSITY Campus

Paternoster

Course Overview

The Professional Locksmith Certification Course is designed to equip individuals with the essential skills and knowledge needed to pursue a successful career in locksmithing

This comprehensive 20-module course covers everything from basic lock mechanisms to advanced security systems, providing hands-on training and theoretical understanding. Whether you're a beginner or looking to enhance your locksmithing expertise, this course will prepare you for real-world challenges in the locksmith profession
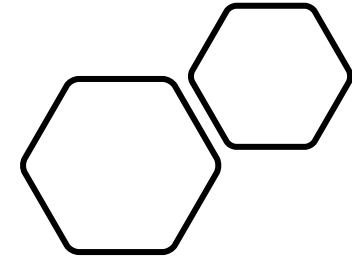

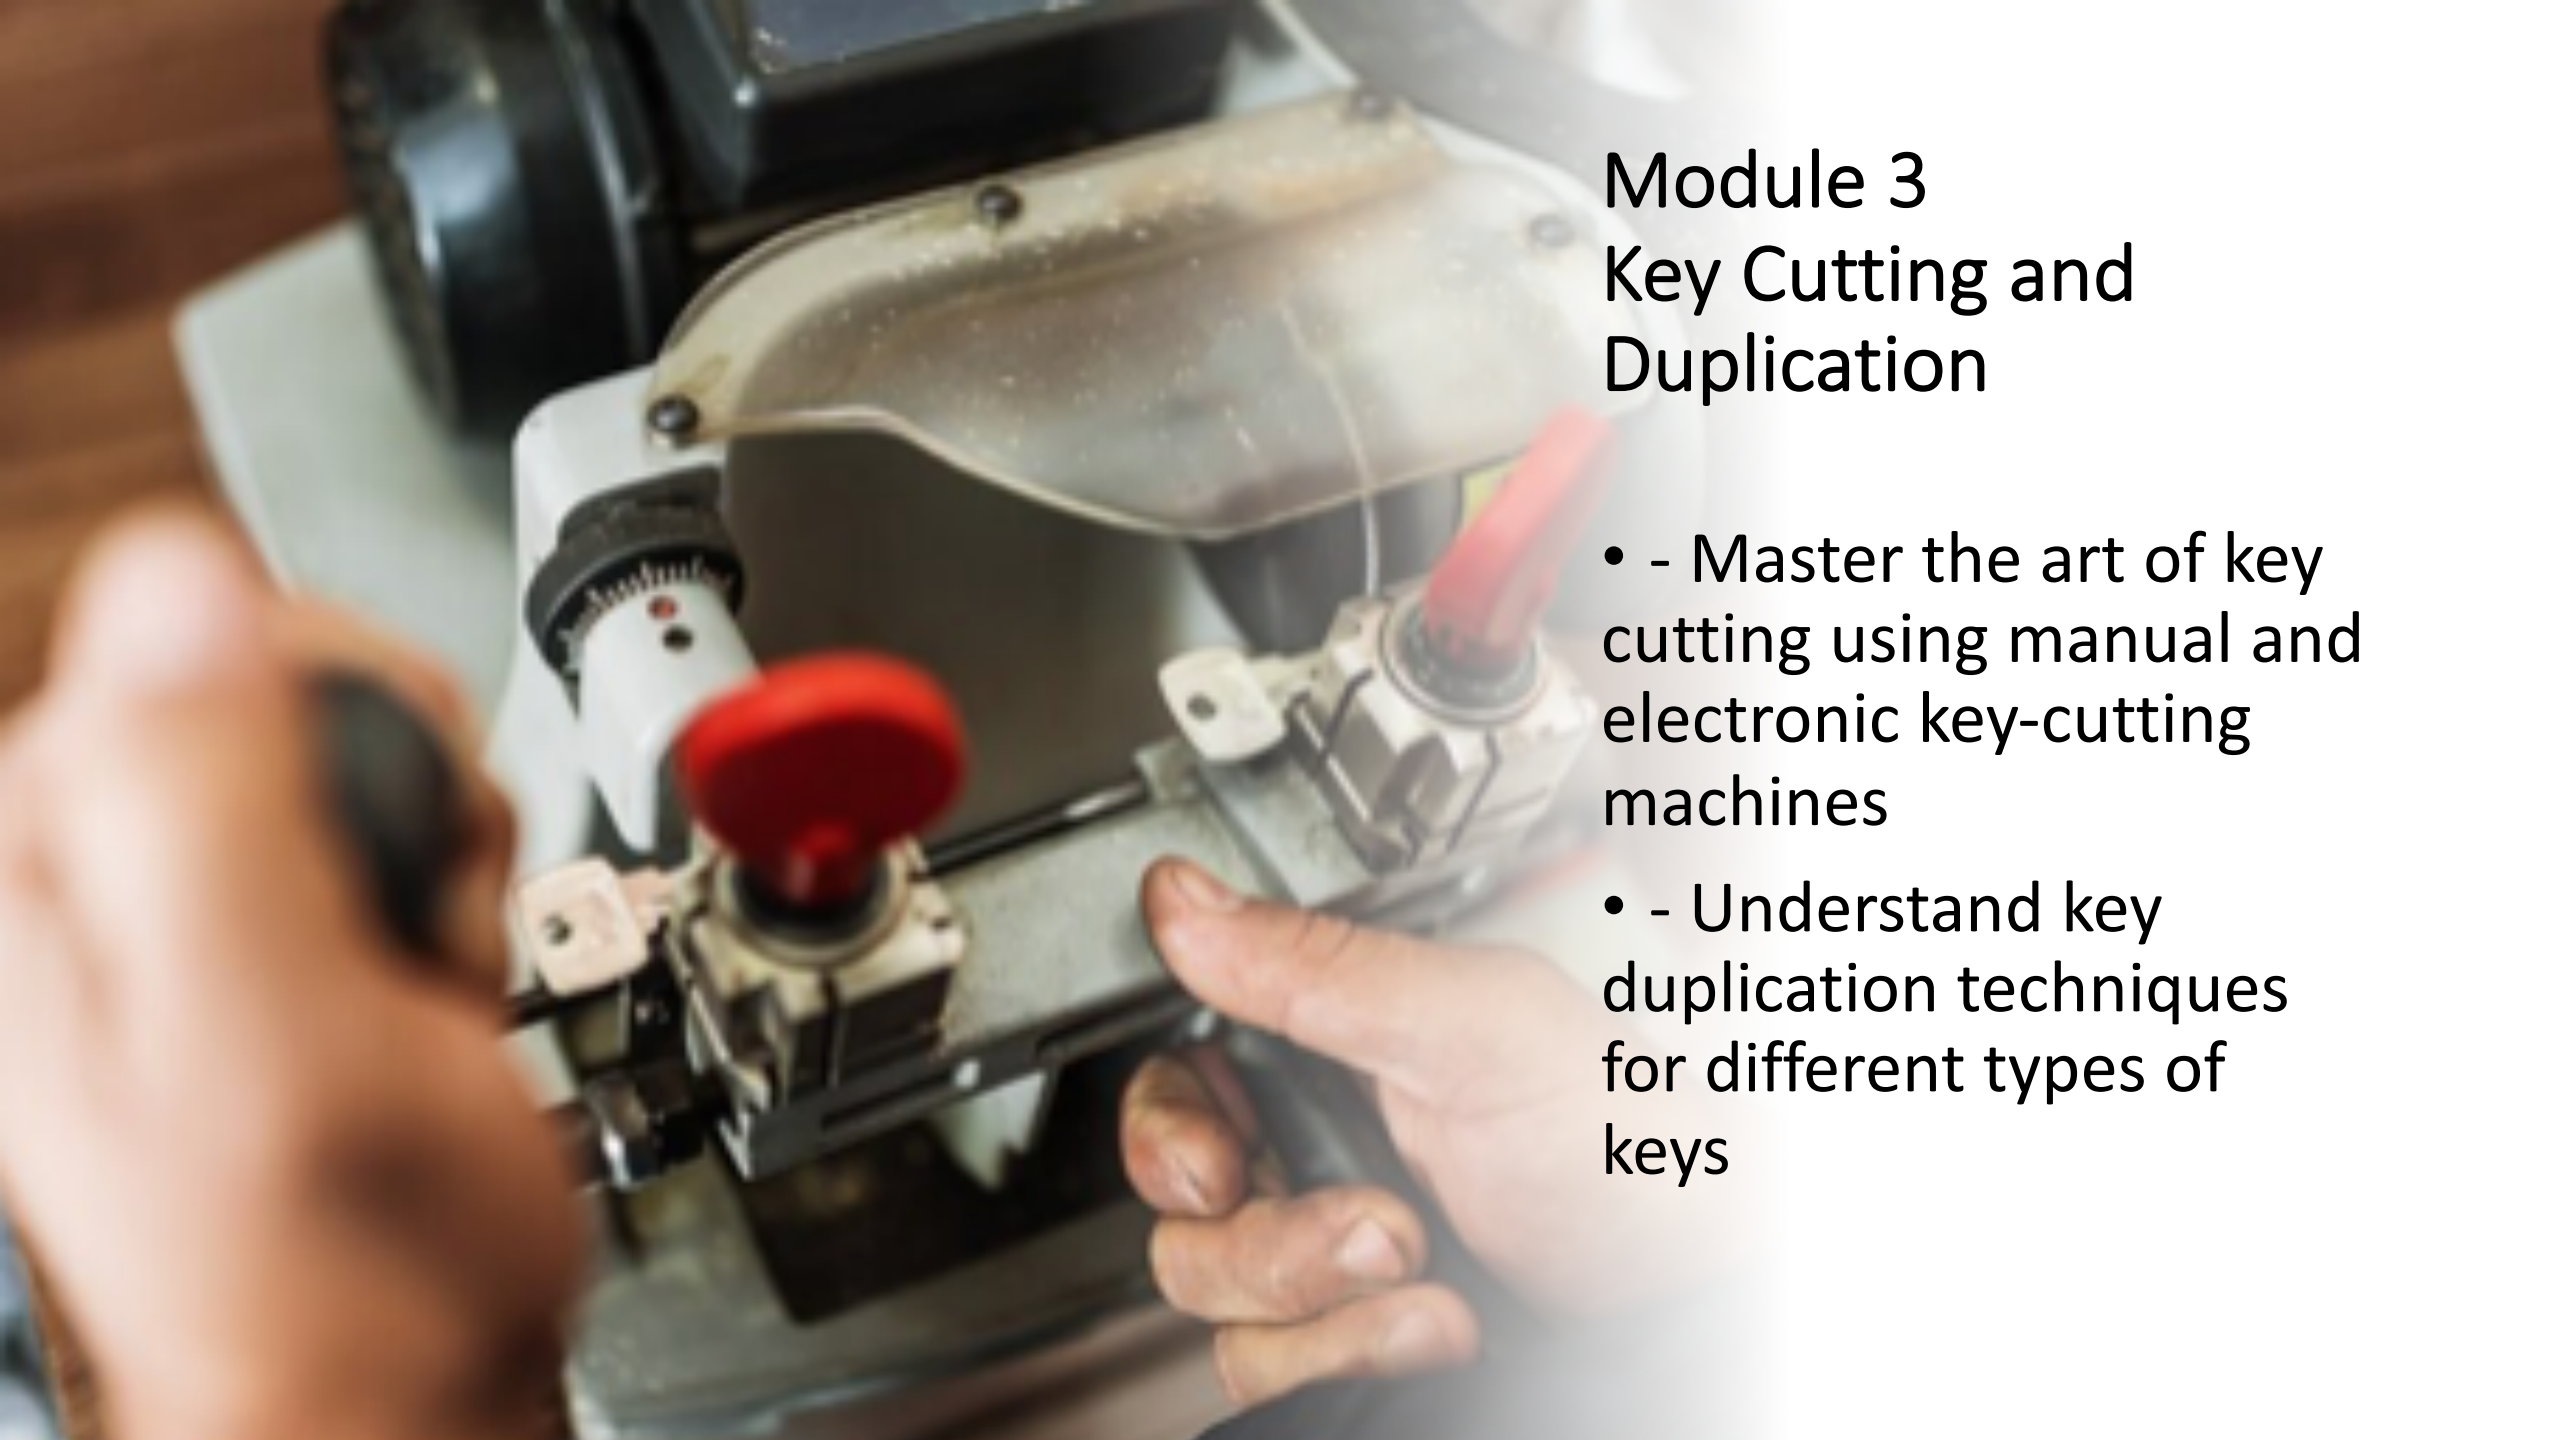

Module 1
Introduction to Locksmithing

- - Understand the history and evolution of locksmithing

- - Explore the various roles and responsibilities of a professional locksmith

- - Learn about ethical considerations and legal aspects in the locksmith industry

Module 2
Basic Lock Mechanisms

- - Study the fundamental principles of common lock types

- - Explore the anatomy of pin tumbler locks, wafer locks, and tubular locks

- - Learn the basics of lock manipulation and picking

Module 3
Key Cutting and Duplication

- - Master the art of key cutting using manual and electronic key-cutting machines

- - Understand key duplication techniques for different types of keys

Module 4
Residential Lock Systems

- - Explore residential lock designs and installation techniques

- - Learn to rekey locks, install deadbolts, and provide home security solutions

Module 5 Commercial and Industrial Lock Systems

- - Study high-security lock systems used in commercial and industrial settings

- - Understand access control systems and keyless entry mechanisms

Module 6 Automotive Locksmithing

- - Dive into the intricacies of automotive locks and ignition systems

- - Learn car key programming, lockout resolution, and key extraction techniques

MODULE 7
Safe and Vault Technology

- - Explore the components of safes and vaults

- - Learn safe cracking, repair, and maintenance

Module 8
Electronic Security Systems

• - Understand the principles of electronic security systems

• - Explore the installation and maintenance of electronic access control and surveillance systems

Module 9
Locksmithing Tools and Equipment

- - Familiarize yourself with the various tools used in locksmithing

- - Learn how to use lock picks, tension wrenches, and other specialized equipment

Module 10
Master Key Systems

- - Explore the design and implementation of master key systems

- - Learn to create and manage key hierarchy for residential and commercial spaces

Module 11
Locksmith Business Practices

- - Understand the business aspects of running a locksmith service

- - Explore marketing, customer service, and ethical considerations

Module 12
Legal and Regulatory Compliance

- LEARN ABOUT LICENSING REQUIREMENTS FOR LOCKSMITHS

- UNDERSTAND INDUSTRY REGULATIONS AND COMPLIANCE STANDARDS
